### **BF-P1100**

MODEL	BF-P1100
Standby Power (50Hz)	880KW /1100KVA
Prime Power (50Hz)	800KW /1000KVA

## **Standard Features**

General Features: Engine (Perkins 4008TAG2A) Radiator 50<sup>o</sup>C max, fans are driven by belt, with safety guard 24V charge alternator Alternator: single bearing alternator IP23,insulation class H/H Absorber Dry type air filter, fuel filter, oil filter, coolant filter Main line circuit breaker Standard control panel batteries, rack and cable Ripple flex exhaust pipe, exhaust siphone, flange, muffler User manual

Prime Power (PRP): Prime power is available for an unlimited number of annual hours in variable load application, in accordance with GB/T2820-97 (eqvISO8528); A 10% overload capability is available for a period of 1 hour within a 12-hour period of operation.

Standby Power Rating (ESP): The standby power rating is applicable for supplying emergency power for the duration of a utility power interruption. No overload, utility parallel or negotiated outage operation capability is available at this rating.

### **Sales Promises**

Baifa Power provides a full line of brand new and high quality products. Each and every unit is strictly factory tested.

Warranty is according to our standard conditions: 12 months or 1,000 running hours, subject to the earlier one.

Service and parts are available from Baifa Power or distributors in your location.

Specifications may change without notice

Auto Module Control Panel is the configuration for nobody on duty controlling generators. This kind of panel adopts auto module control system, with large LCD display to show the menu.

Features: MRS10-can receive remote output signal from ATS and realize auto start and stop of generators.

MRS16-can realize all functions of MRS10, add RS232 interface which can communicate with PC to realize remote operation.

AMF25-Auto Mains Failure controller, can realize all functions of MRS16, furthermore can detect ATS and control directly.

## Auto Parallel Control Panel

Automatic Parallel Control Panel This new automatic parallel system adopts intelligent modules, inserted and folded installed, no need the peripheral relay and logic circuit. The main switch adopts electronic breaker or frame breaker, combined together with the generator, which is very reliable. One generator, one panel. The panel can be used both for singly and parallel. It is only need to parallel generator with such panel when the capability needs to be enlarged in the future.
